

PlayerOne Genesis Land Plan

Everyone Can Build Metaverse

A stylized, blocky digital cityscape at night. The buildings are constructed from dark, rectangular blocks and are illuminated with various colors of light. Signs on the buildings include "GREASE VALLEY BAR", "GAMINGBAR | PARCADE", "Neinlender", and "01-584-483-13". The scene is set against a dark blue background with a subtle grid pattern.

Introduction

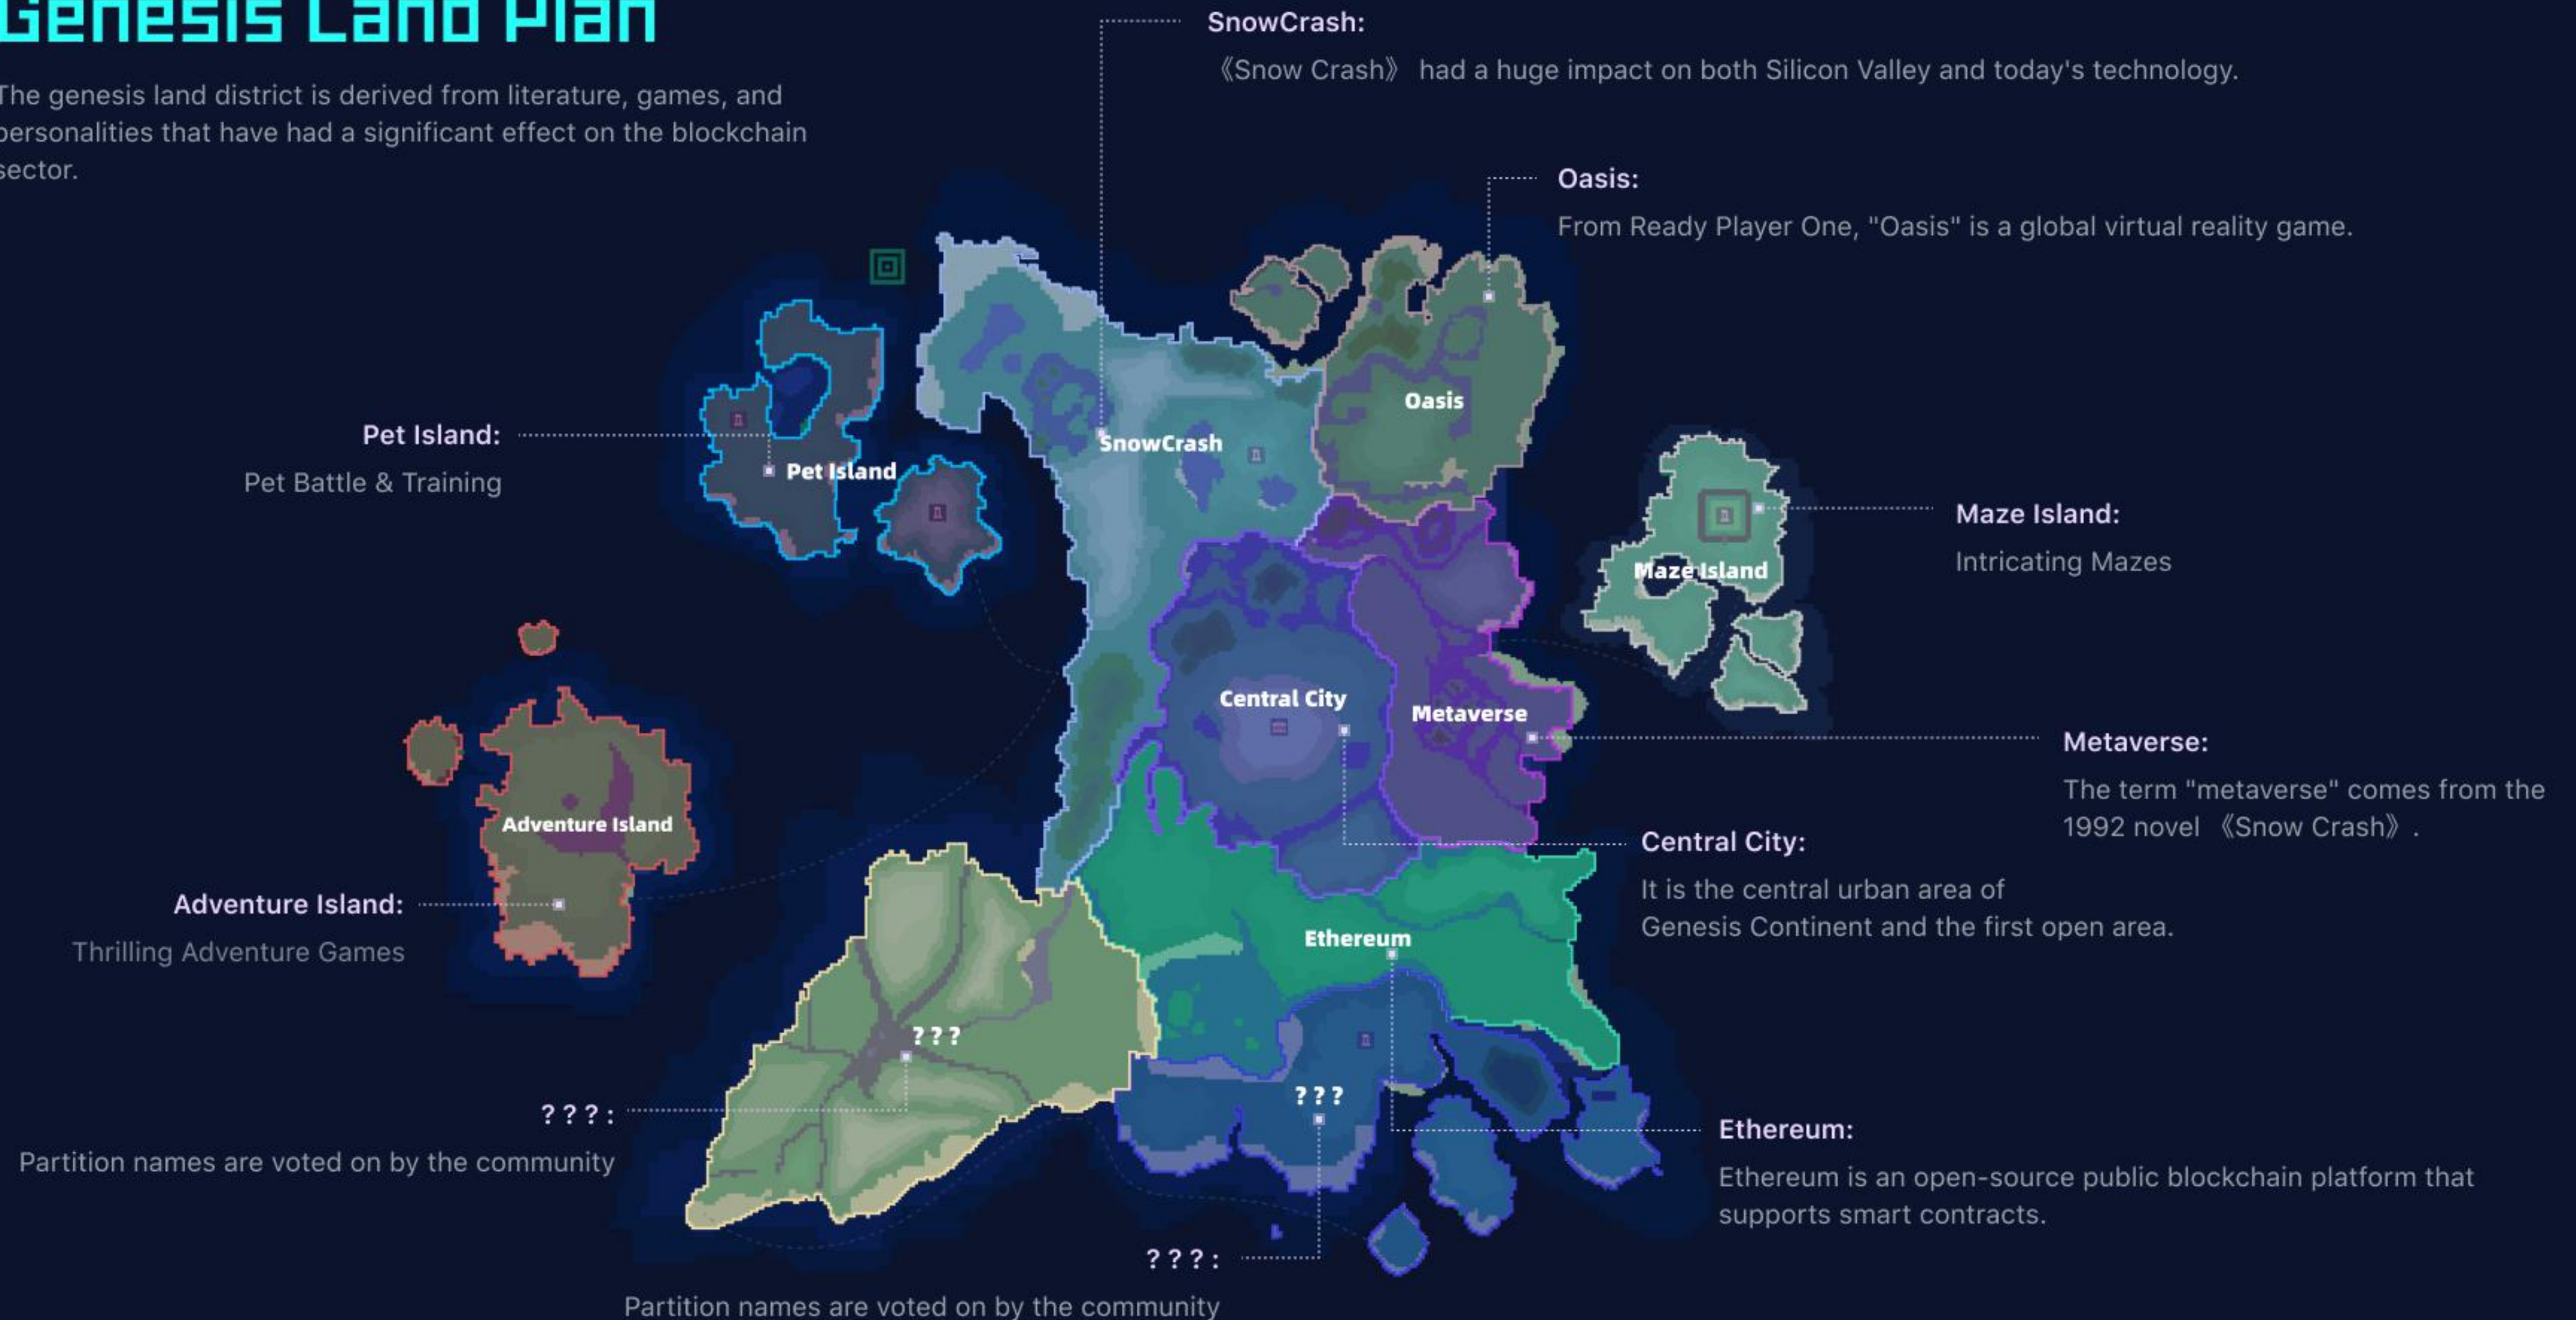

PlayerOne is a sandbox gaming platform based on blockchain technology. It is divided into four sections: strong creative tools, vibrant social scenes, accessible trade marketplaces, and a Play to Earn gaming system.

PlayerOne is constructing a world with an open metaverse. Everyone in this world may make special objects and structures, transfer original NFT works into Metaverse, enjoy NFT works by the world's top artists, and converse with like-minded peers online.

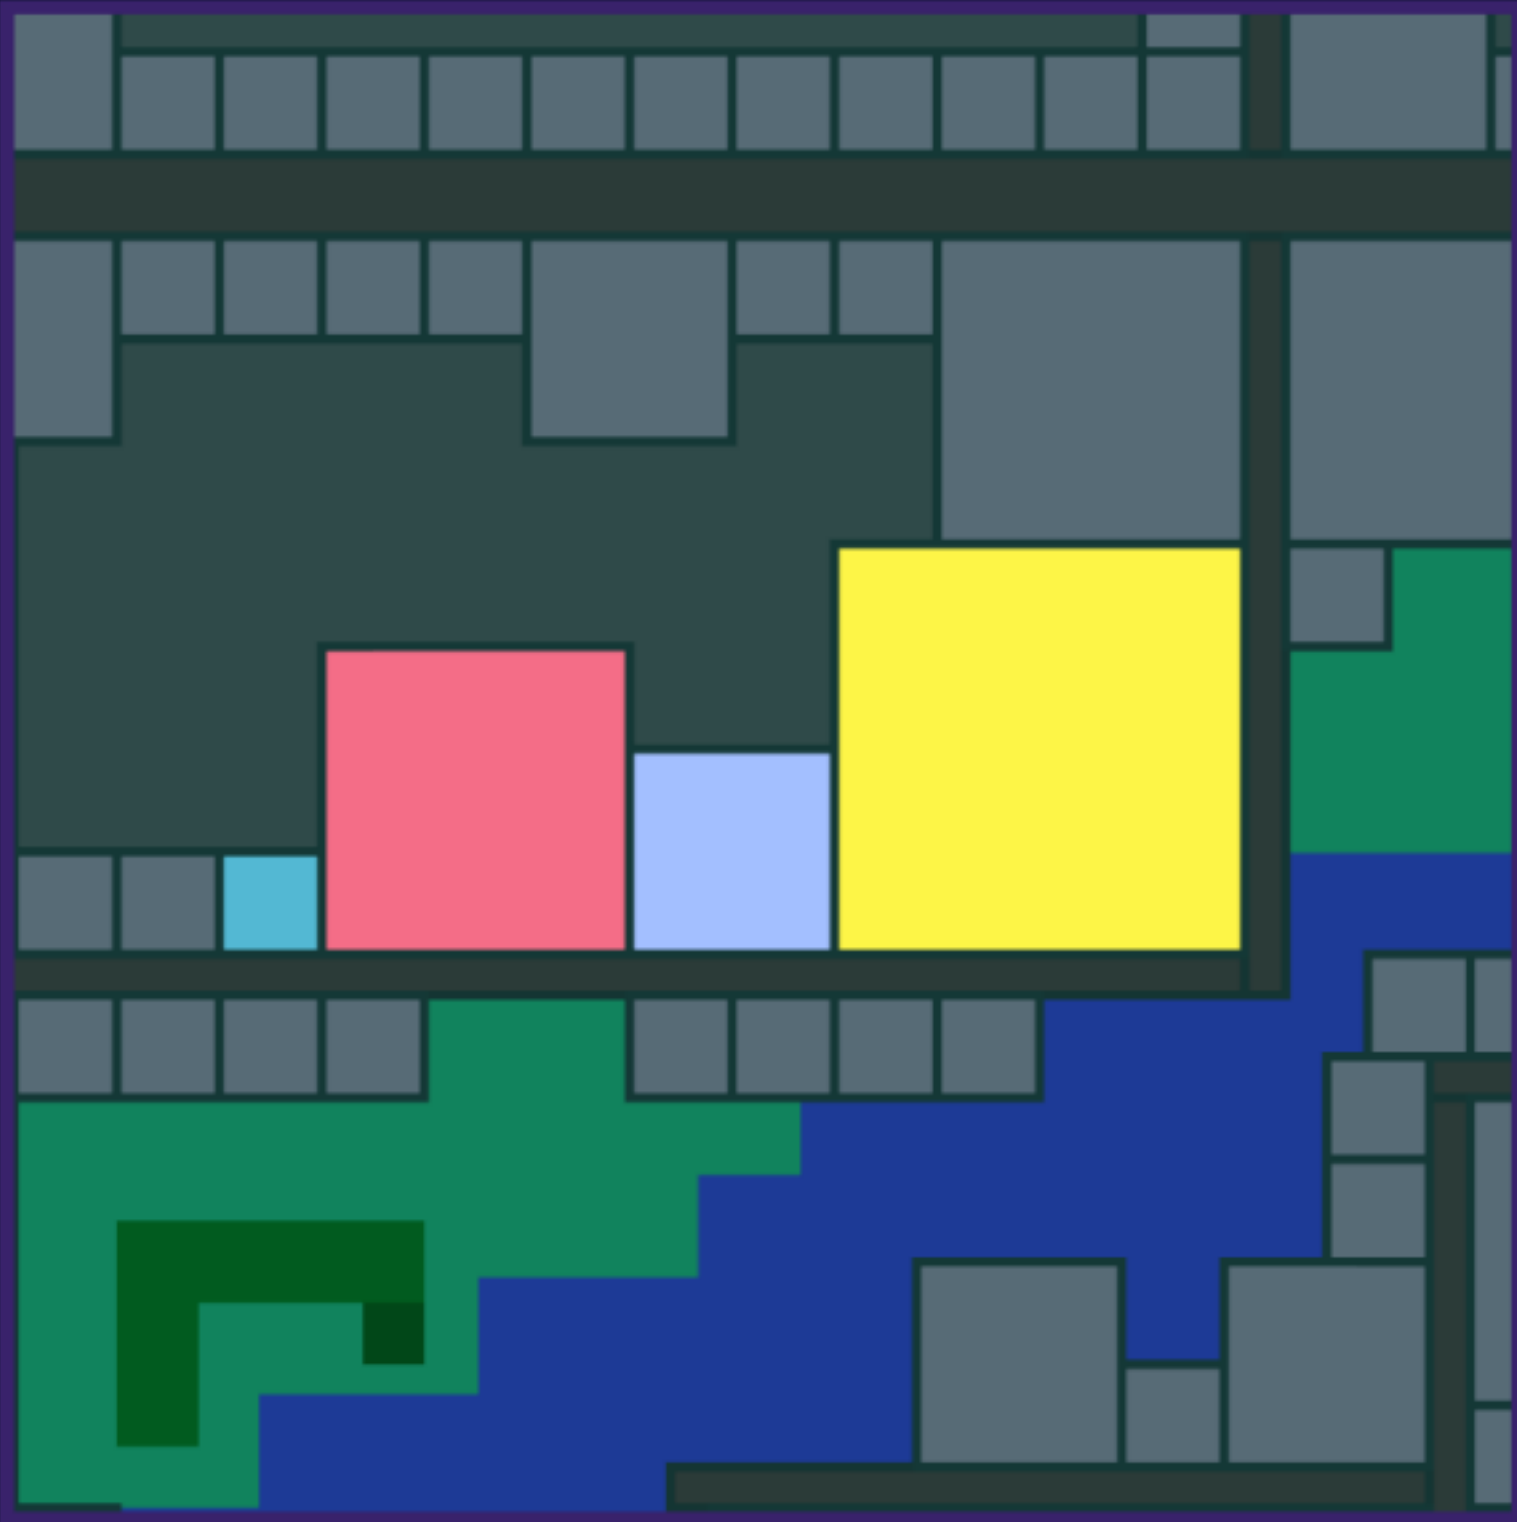

You may also capture a special pet in the metaverse, take it swimming in the virtual world, or train it, fight alongside it, and let it generate significant revenue for you through PVE or PVP.

I Genesis Land Plan

The genesis land district is derived from literature, games, and personalities that have had a significant effect on the blockchain sector.

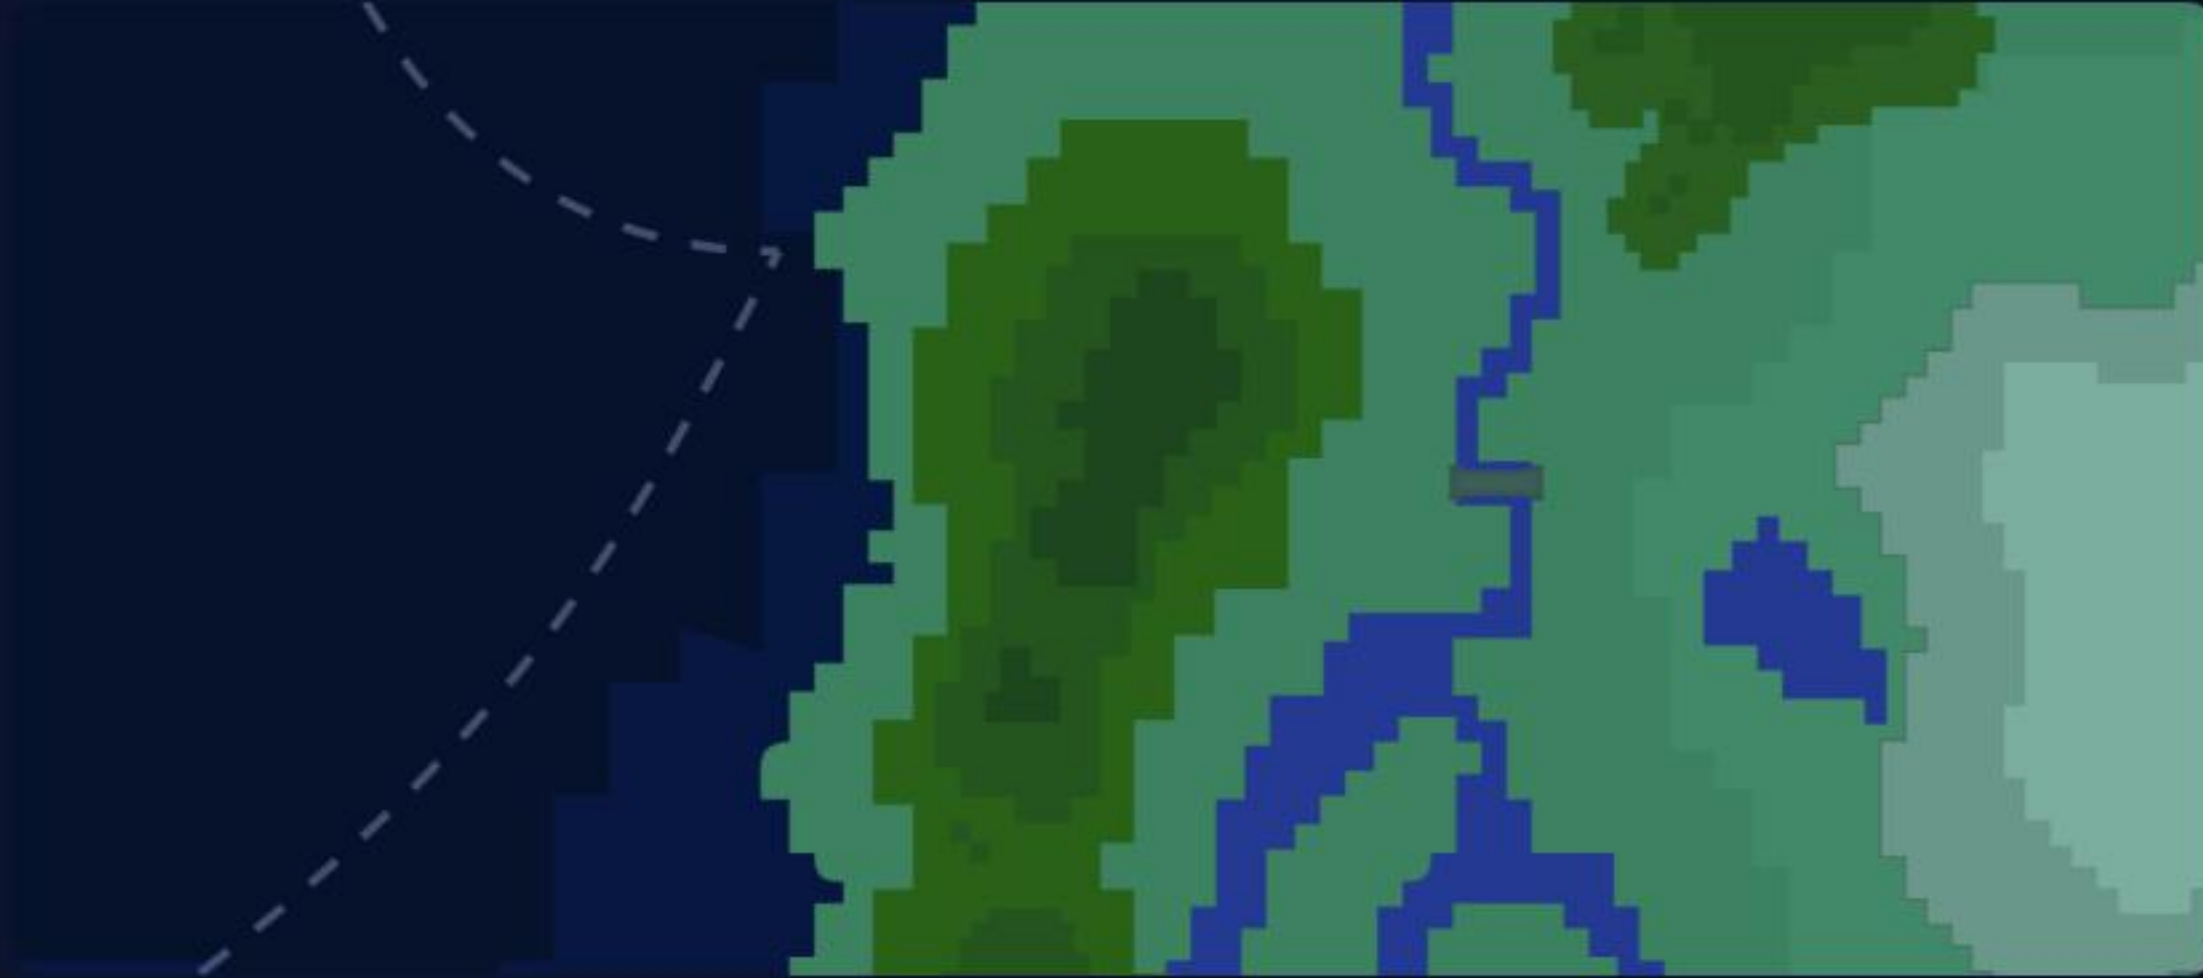

| Land Sale Details

Parcel Type	Area	Supply	Price
Standard	10*10	720	0.20 ₿
Large	20*20	200	0.80 ₿
X-Large	30*30	60	1.80 ₿
Mega	40*40	20	3.20 ₿

In the first phase, we are releasing four types of land: 10*10, 20*20, 30*30 & 40*40. To avoid a situation where investors can't acquire land because of a competitive niche, we've implemented a whitelist method; as long as you are whitelisted, you may buy land. Each whitelisted members may purchase 1 to 2 plots of land. If you wish to acquire additional whitelists, you may actively participate in PlayerOne's Twitter and Discord WL giveaways.

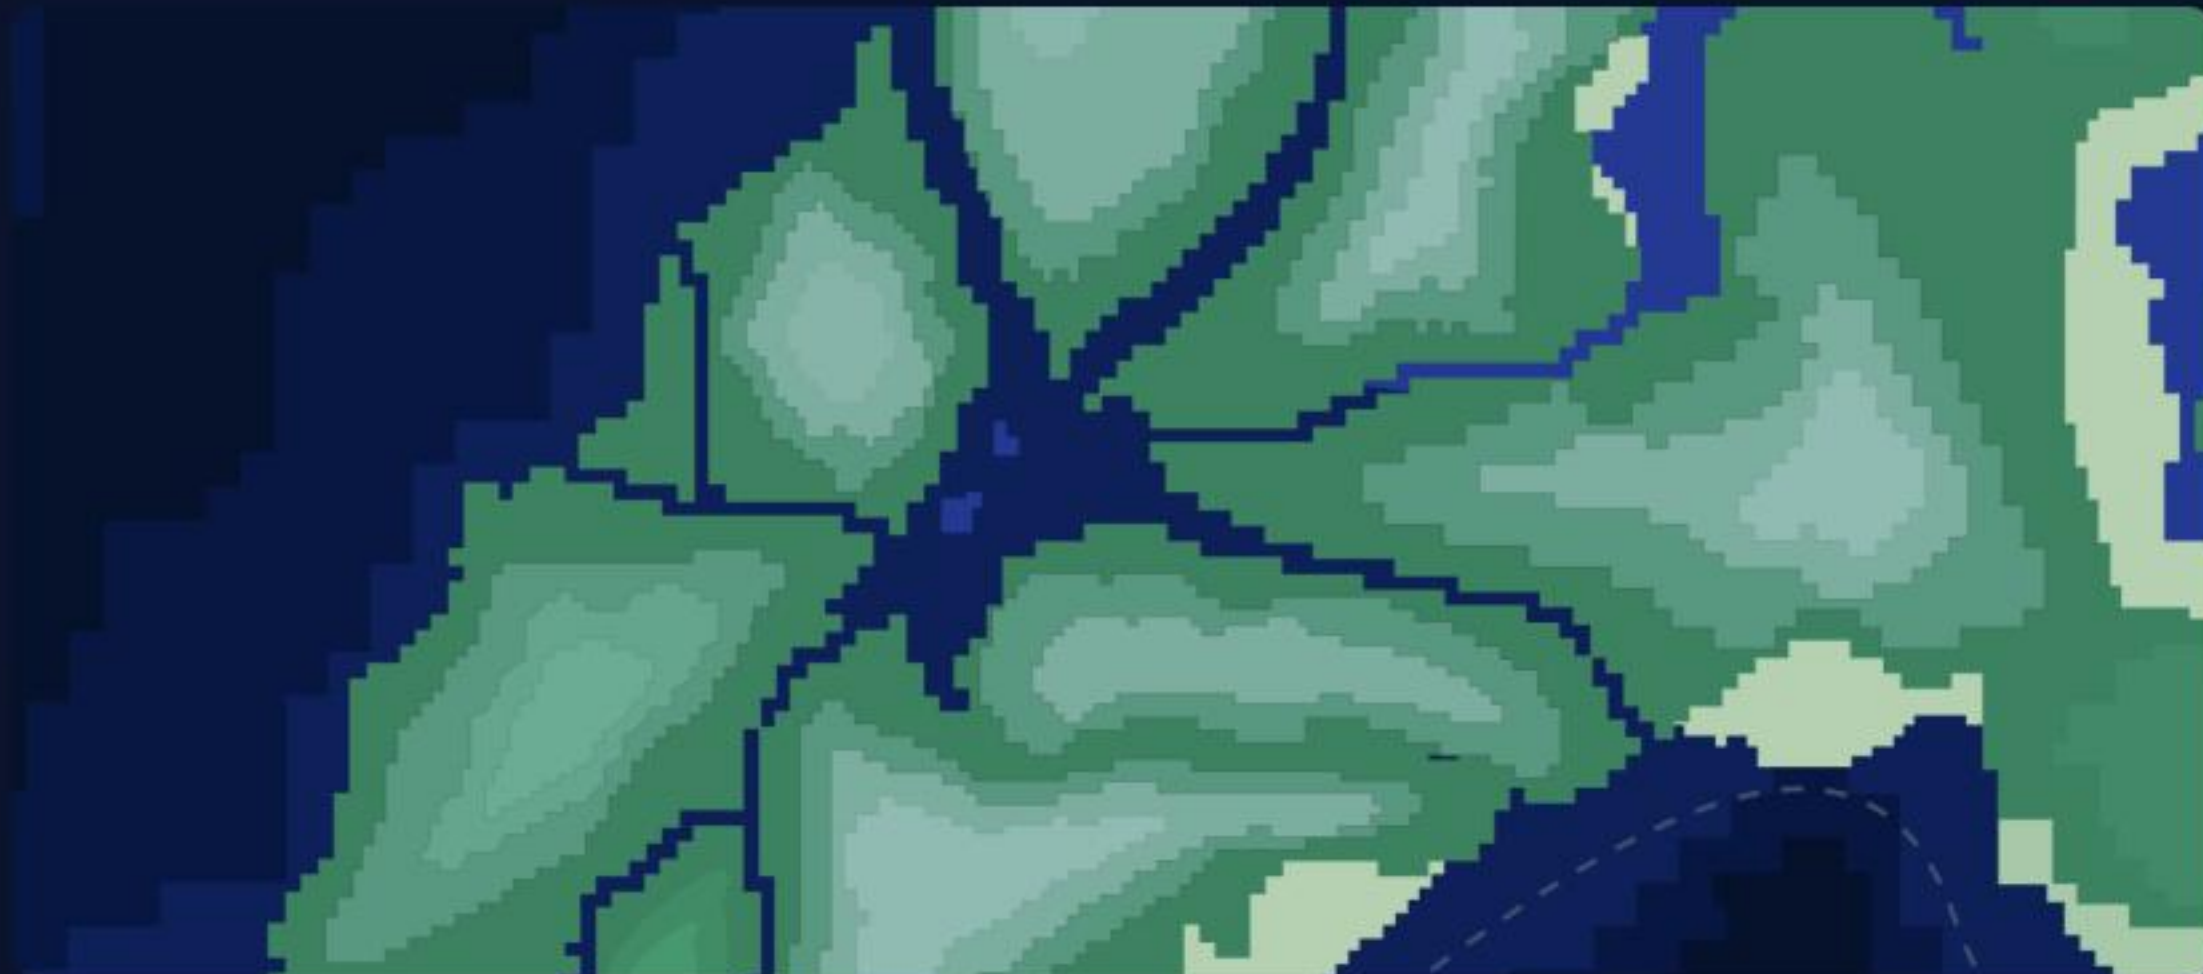

I Geographical Environment

Rivers & Lakes

The river serves as a vital link between the hinterland and the other islands. It serves as a mode of transportation. On both banks of the river, there are several **wharves**. Genesis island residents can board a **cruise ship** to experience the views on both sides of the river. As a result, the value of land on both sides of the river has increased.

Genesis island is home to a number of **lakes**. The lakes provide one-of-a-kind scenery, and the land surrounding the lakes and on the inner islands is an even more rare phenomenon.

Mountains & Oceans

The Genesis island has a great amount of mountains. The property on the mountains offers unique **altitude** features in addition to area and geographic coordinates, thus the structures on the mountains have an extraordinarily extensive field of **vision**.

Because the Genesis island is surrounded by water, the Genesis Continent has many **sea-view apartments**, and there are several ports around the shore that can take **cruise ships** to the neighboring islands.

I Buildings

The Genesis island will include **model rooms** meticulously constructed by PlayerOne. Players just need to alter the images and videos they want to use after purchasing them.

The "Level-Up" feature is present on PlayerOne's land, and various sizes of land correspond to varying amounts of growth qualities.

Basic Information

Price	0.20 ETH
Area	10*10
Decoration style	Modern
Location	Central City
Rental Income	-
